(54) Title: A HEATING DEVICE FOR A FEEDING BOTTLE

(57) Abstract: A heating device (10, 36, 110), adapted for use with an infant's feeding bottle for heating a flow of liquid feed. The device can be releasably connected to the feeding bottle and includes an inlet (14, 114) for receiving a flow of liquid feed from the feeding bottle, and outlet (16, 116), for permitting the flow of liquid feed to leave the device, the outlet being in fluid communication with the inlet. The device (10, 36, 110) further includes means for heating (18, 122) the liquid feed as it flows between the inlet and outlet such that a flow of liquid feed from the feeding bottle through the device leaves the device through the outlet means at an elevated temperature.

**A. CLASSIFICATION OF SUBJECT MATTER**  
IPC 7 A47J36/24

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)  
IPC 7 A47J

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

### \* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
